

(Submission 2 - 1st submission was missing some of this information)I am writing to tell you that the current rf radiation exposure limits are very high and should be completely lowered. I have been injured by rf radiation that complies with the current exposure limits. These limits do not right now account for biological needs and responses. Cell phone towers should not be put on private dwellings, hospitals or nursing homes, or schools. The landline switched telephone network must be maintained. Smart meters should not be mandated nationally. There is too much radiation being emitted.

I have been very ill from exposure to the cell phone antennas (base station) on my roof for many years. It changed my life and made me disabled in many ways especially making it hard if not impossible to participate in many activities where there are cell phone antennas, which is basically now almost everywhere, especially if they are directly on the roof of the building I may be in. I never used to have such a reaction. But after the base station and bars were put on my building I became more and more sensitive to these towers -- 1st on my own building where I had problems and reactions everytime I was at my home (which abated when I left home), and then noticing and responding to towers on many buildings around me where ever I was walking or going.

I also became sensitive to cell phones, many wireless products such as computers and also many electrical appliances.

When cell phone towers were turned on on my roof, we could immediately feel a magnetic pull, as if something was literally pulling or drawing us and it was toward the direction of one of the antennas on one side of the apt. We could feel also something emitting like waves of heat from the direction of the base station hut on the opposite side of the apt. We had to open all the windows thought it was a cold snowy winter night in December. We could feel many small shocks all over the body, and hear a high pitched frequency which never ceased. I think that when the tower was turned on that was initially when I became very injured from the immediate impact of such a high exposure suddenly which harmed my own human personal magnetic field. Gaus meters would show we were in the red zone on the meter all the time. Sometimes there were several frequencies and pitches overlapping. I was in extreme pain, suffered a seizure, and had female bleeding for many weeks. Those living with me also heard constantly an undercurrent of noise and high pitches. I had to seek refuge at a friend's house where I had to lie down for several days on the floor. I could not sit because the room would appear to spin and I felt I was turning incessantly. I felt everything was spinning as if there was no magnetic pole to hold on to. I held on to the legs of a chair in order to feel that I could hold on to something. I also felt as if I had been nuked - no other way to describe it exactly -- as if when one is out in the sun too long and gets some sun poisoning and is hot and nauseous-- except I had not been in the sun at all and this was in the middle of December winter. This is from too much emf exposure. I had to leave my home for several months. Burn marks on my skin near the pelvic area appeared and have continued and grown larger over many years. Being exposed for so many years to too much rf radiation often causes me to become dizzy, to lose my physical balance, to feel the room is spinning, sometimes to have to sit or lie down on the floor to make the spinning stop, often to feel nauseous, and

to be extremely hot on the skin. These are symptoms of radiation illness. It also interferes with sleeping. I am awakened by the noise from the antennas- the high pitches which are on sometimes much louder than other times. It interferes with my hearing much of the time. Blood pressure has gone up sky high, with heart palpitations and migraines. The frequencies especially affect the heart beat making it beat very fast. A pain in the back of the head near the occipital ridge often recurs with a feeling of a constant beat or pulse being very prominent for many years. In my home also all the pets suffered catastrophic illnesses with unusual and enlarged tumors of cancer from which they died.

The exposure of rf from the towers also made me become very sensitive to cell phones. I rarely ever used a cell phone. The first time I ever used a cell phone was in 1999 when I borrowed a phone to ask for directions and spoke one or two minutes. Afterwards I rarely used a cell phone nor did any of my colleagues. I have never owned a cell phone and never had any regular use at all of a cell phone. My symptoms did not come from a phone but from the antennas which sensitized me to the frequencies and to the phones. I cannot use a phone on my own ear and am sensitive to people using cell phones around me. I feel sharp burning pains when the phones are near me. It is very difficult to be where people always use cell phones, which at this point is almost everywhere, for example in public transportation, or religious meetings, theatres or almost anywhere that people gather, or in offices or classes. If someone holds a cell phone behind my head for example on a crowded bus I will feel burning pain -- like extreme hot fire in my head which will last for several hours. I rarely ever used a cell phone. In 1999 a friend had one and used it sparingly. I did not hear any high pitches or frequencies and did not have any responses to the phone. But I became more and more sensitive to them. I cannot use a cell phone for any long time. If I do use one even for a minute, I have immediate and long lasting reactions to it with burning in my ears and redness and burn marks on my skin and long term pain and interference with hearing. It is after the tower was placed on my building that I began to hear these frequencies and respond to them and with each passing year I became more and more sensitive to emf radiation because of the constant exposure in my home all around me. I have developed this sensitivity to cell phones, computers and many electrical appliances. This is electromagnetic hypersensitivity. I cannot use a cell phone for daily and or regular communication. There is at least 3% of the population who have the same difficulty. (about 10 million people). (That is those that are known).

It is hard to reveal these personal issues but it is paramount to inform you, those who would change the system of phones. I want to be able to communicate with people. If I have to use a cell phone I will not be able to communicate with others in any regular way. I want to be able to communicate and enjoy the freedom of our wonderful democracy here to choose the type of voice phone I need. It is of utmost importance to maintain the switched telephone network. I do not stop people from using their cell phones. Please do not stop me from using my land line.

Electromagnetic sensitivity makes it also very difficult to be near medical machines or in an ER facility. A medical protocol is needed for magnetic hypersensitive people using more analog machines and rooms where there are no cell phones or many wireless devices.

After all these years there still is no recognition of magnetic electrical sensitivity as a disability. It is necessary to train doctors who recognize radiation illness and sensitivity to emf and rf radiation. We also need radio free zones throughout the country.

RF radiation is very dangerous and is also affecting the pollinators - the bees and butterflies and other beneficial insects who are too sensitive to the frequencies, and radiation. These pollinators help our food chain. If we have no pollinators we will not have food. The radiation of the towers and constant increase of frequencies and all of the radiation we are being emmersed in from the towers, smart meters and wireless devices, is causing health problems and the endangerment of our food for the world!

This must be curtailed and a return to many analog devices be made. The wireless radiation is causing U.S. and worldwide, health problems, cancer, genetic changes in all life forms and contributing to the global warming and terrible weather conditions of storms.

Smart meters should not be made mandatory nationwide. Many people already are experiencing problems from them with so much radiation being placed directly on their homes. It makes appliances buzz and transfers the radiation through the wiring into the home. It has caused heart attacks. It has made people leave their homes. There have been many incidents where the meters arc electrically and cause fires and explosions. They are causing cancer and tumors.

Smart meters are also the nail in the coffin for the bees and other pollinators. The meters are emitting too much radiation and they cannot withstand it and are dying. We need our pollinators for food. The current radiation exposure limits are much too high and are affecting all life on this planet negatively. These limits must be completely lowered now. Thank you for your attention.
